#### **DETAILED ACTION**

## Status of the Application

Claims 56, 58-66, 68-78 are pending.

Applicant's amendment of claims 56, 58, 68, 69, 70, and cancellation of claims 57, 67 in Paper No. 12, filed on 8/20/2003 is acknowledged.

Upon further consideration, the finality of the previous Office Action Paper No. 11, mailed on 5/20/2003 is hereby withdrawn due to new ground(s) of rejection not previously introduced.

Claims 74-78 remain withdrawn from further consideration by the Examiner, 37 CFR 1.142(b), as being drawn to an invention non-elected without traverse in Paper No. 9, filed 6/21/01.

Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

#### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 09/762,258

Art Unit: 1652

Claims 56, 68-73 are rejected under 35 U.S.C. 102(e) as being anticipated by Bandman et 1. al. (U.S. Patent No. 6156523, effective filing date 11/15/1996). Bandman et al. teaches a polynucleotide encoding a serine/threonine protein kinase which is 93.7% sequence identical to the open reading frame of SEQ ID NO: 1. See attached alignment. The open reading frame of SEQ ID NO: 1 consists of nucleotides 77 through 1561 (1485 nucleotides). An alignment of the polynucleotide of Bandman et al. and the polynucleotide of SEQ ID NO: 1 shows that the polynucleotide of Bandman et al. is missing nucleotides 77-88 of SEQ ID NO: 1 (12 nucleotides), and has 81 mismatches within nucleotides 89-1561 of SEQ ID NO: 1 (including gaps). As such, the polynucleotide of Bandman et al. has a total of 1392 matches (1392=1485-12-81) over the open reading frame of SEQ ID NO: 1 and is 93.7% (1392x100/1458) sequence identical to the polynucleotide of SEQ ID NO: 1 within nucleotides 77-1561 of SEQ ID NO: 1. Since claim 56 is directed to a polynucleotide having at least 85% sequence identity to the open reading frame set forth in SEQ ID NO: 1, the polynucleotide of Bandman et al. anticipates claim 56 as written. Bandman et al. also teaches the use of promoters operably linked to the polynucleotide (column 15, lines 23-49), vectors comprising the polynucleotide (column 15, lines 23-49), host cells comprising said vectors (column 15, line 60-column 17, line 4), and methods of recombinantly producing the polypeptide encoded by the polynucleotide (column 15, line 23, column 18, line 45). Since claims 68-73 are directed to the polynucleotide of claim 56 further comprising an operably linked promoter, a vector comprising the polynucleotide of claim 56, a host cell comprising said vector or said polynucleotide, and a method to recombinantly produce the polypeptide encoded by the polynucleotide of claim 56, the teachings of Bandman et al. anticipate the claims as written.

Application/Control Number: 09/762,258

Art Unit: 1652

### Allowable Subject Matter

2. Claims 58-66 appear to be allowable over the prior art of record but are objected to because they depend upon a rejected claim.

#### Conclusion

- 3. It is noted that if the references cited by the Examiner are too long, only relevant pages will be enclosed with the instant Action.
- 4. Certain papers related to this application may be submitted to Art Unit 1652 by facsimile transmission. The FAX number is (703) 308-4556. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 CFR 1.6(d)). NOTE: If Applicant submits a paper by FAX, the original copy should be retained by Applicant or Applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED, so as to avoid the processing of duplicate papers in the Office.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Delia M. Ramirez whose telephone number is (703) 306-0288. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Ponnathapura Achutamurthy can be reached on (703) 308-3804. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
